

C'mon fellahs! :) This is an advancement for the country not a problem!! Let's quit trying to squander all the great companies in this country with your stupid lawsuits and political BS!! Where would we be today if it weren't for the success of great American Companies like Microsoft that actually help the economy of this country rather than hurt it. If we don't move forward with this technology, other countries will. I live way up near Canada and then travel to Boston on a regular basis. I can't get the traffic and weather for Boston up here. We don't even have Cable TV!!! Anyway.. Hearing about this just makes me want to puke!! Jealousy is very ugly and here's another perfect example of the stupidity of people who can't innovate trying to squander the efforts of those who want to make this country better. If they had the talent to invent XM Radio they wouldn't give a crap if XM was successful. It just wasn't their idea and they can't compete in any other way except to pay dirty pool. Please tell me this isn't the American Way!! :)
